4-YEAR OR MORE COLLEGE DEGREE AND/OR EQUIVALENT EXPERIENCE

Computer & Information Systems Managers \$50.70 Plan, direct, or coordinate activities in such fields as electronic data processing, information systems, systems analysis, and computer programming.

Computer Programmers \$37.33 Create, modify, and test the code, forms, and script that allow computer applications to run. Work from specifications drawn up by software developers or other individuals. May assist software developers by analyzing user needs and designing software solutions. May develop and write computer programs to store, locate, and retrieve specific documents, data, and information.

Computer Systems Analysts \$43.37 Analyze science, engineering, business, and other data processing problems to implement and improve computer systems. Analyze user requirements, procedures, and problems to automate or improve existing systems and review computer system capabilities, workflow, and scheduling limitations. May analyze or recommend commercially available software.

Network & Computer Systems Administrators \$38.36 Install, configure, and support an organization's local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system. Monitor network to ensure network availability to all system users and may perform necessary maintenance to support network availability. May monitor and test Web site performance to ensure Web sites operate correctly and without interruption. May assist in network modeling, analysis, planning, and coordination between network and data communications hardware and software. May supervise computer user support specialists and computer network support specialists.

1-2 YEAR COLLEGE DEGREE (OR CREDENTIAL)

Computer Network Support Specialist \$24.73 Analyze, test, troubleshoot, and evaluate existing network systems, such as local area networks (LAN), wide area networks (WAN), cloud networks, servers, and other data communications networks. Perform maintenance to ensure networks operate correctly with minimal interruption.

Computer User Support Specialists \$25.81 Provide technical assistance to computer users. Answer questions or resolve computer problems for clients in person, or via telephone or electronically. May provide assistance concerning the use of computer hardware and software, including printing, installation, word processing, electronic mail, and operating systems.

HIGH SCHOOL DIPLOMA OR GED / ON-THE-JOB-TRAINING

Telecommunications Equipment Installers and Repair \$22.23 Install, set-up, rearrange, or remove switching, distribution, routing, and dialing equipment used in central offices or head ends. Service or repair telephone, cable television, Internet, and other communications equipment on customers' property. May install communications equipment or communications wiring in buildings.

Computer Numerically Controlled Tool Operators \$19.37 Transfer commands from servers to computer numerical control (CNC) modules, using computer network links. Confer with supervisors or programmers to resolve machine malfunctions or production errors or to obtain approval to continue production.
